OSRS has farmed these breeds for 29 years; longer than any other farmer. OSRS has been producing rams for sheep farmers since 1954. Rams are vet tested, guaranteed. OSRS has performance recorded since 1960's and all flocks are SIL recorded.

OSRS will again be at Waimumu Southern Field-days. Same site, different number (139), tea and coffee, lovely sheep, lots of laughs, bright and breezy with no politics (perhaps a little).

- FIRST** commercial farm to have Texel, Finn and Oxford sheep in NZ, wayback 29 years ago.
- FIRST** to recognize the role of Finns and Texels as part of the mix with NZ genetics.
- FIRST** to sell Finn-Texel rams.
- FIRST** to arrange supply contracts which rewarded the users of Finn and Texel.
- FIRST** to market Finn and Texel carcasses, large scale, to NZ and export markets.
- FIRST** to market high bulk Texel wool to a processor and provide premiums for producers.
- FIRST** to market bulky Texel wool to export markets.
- FIRST** to promote stabilised crossbred sheep with fixed proportions of Finn, Texel and NZ genetics.
- FIRST** to produce Texel Suffolk rams. **OSRS rams have been top producers in Central Progeny Trials.**
- FIRST** to have eight months of lambing on one farm.
- FIRST** to achieve seven natural sheep matings in eighteen months.
- FIRST** to have an objective of six separate lambings per year without the aid of chemicals.
- FIRST** to produce colourful, informative, proactive newsletters regularly.
- FIRST** to have nine flocks performance recorded with SIL.
- FIRST** to export Finn genetics to South America.

Meat Industry Excellence Group (MIE)

MIE needs support from every farmer.

Please give financial and moral support to MIE which works for all sheep farmers.

ONE STOP RAM SHOP SIRES

Finn Texel Stabilised

Texel Suffolk

Stabilised Quarter Finn Texel ($\frac{1}{4}F$ $\frac{1}{4}T$ $\frac{1}{2}R\&P$)

Dorper

Stabilised Three eighth Finn Texel ($\frac{3}{8}F$ $\frac{3}{8}T$ $\frac{1}{4}R\&P$)

Finn

Perendale Texel

Think Finn!

All New Zealand ewes need a dash of Finn

Finn X ewes:

- Don't have bearings (except an odd one)
- Have some natural facial eczema tolerance (clinical FE has already been identified at Tapanui)
- Don't need flushing
- Perform predictably
- Produce few triplets (less than Coopworths)
- Carcasses yield well
- Finn cross ewes look like New Zealand sheep
- Please the bank manager
- Finn is the most widely used sheep breed in the world
